Source: The Foundation Center, 2009. Due to rounding, figures may not add up. Based on all grants of \$10,000 or more awarded by a national sample of 1,339 larger U.S. foundations. For community foundations, only discretionary grants are included. Grants to individuals are not included in the file. Dollar figures in thousands; grants may occasionally be for multiple types of support and would therefore be counted more than once. Percentages are based on total grant dollars and number of grants reported by foundations in the sample.

<sup>1</sup>Qualifying types of support are tracked in addition to basic types of support, e.g., a challenge grant for construction, and are therefore represented separately.
